Environments: Inspirational planting

*For business.
For pleasure. For you.*

A dramatic first impression... environments that make visitors and employees feel healthier, relaxed and more refreshed... utilitarian spaces transformed with texture, shape, colour and intrigue.

This is the power of inspirational planting. And for Demita, it's a passion that's as natural as the earth itself.

For over 30 years we've been designing and maintaining spectacular environments, inside and out, right across the UK. With an annual turnover in excess of £1m, our contracts range from environments for corporate headquarters and City institutions, to themed designs for malls and leisure centres, to year-round displays for hotels, pubs and restaurants.

Fresh, immaculately styled planting and displays all year round.

Inspiration is affordable with Demita.

"We know display planting is good for growing business. We know, because our clients tell us."

Interiors: Planting and cut flowers

A welcome inside.

Considered planting brings interior spaces alive. We relish every challenge.

From stylish still life, to fresh and cut flower arrangements, to architectural foliage and container planting to exotic feature displays, we pride ourselves on an ability to scale solutions to any level and budget.

The Demita team designs over 100 interior display schemes every year. By meeting at your premises, we see the space first hand. Using digital photo-imaging, we can show the proposed displays in situ.

Live interior displays are not just architectural and aesthetic. Plants restore air quality. They absorb toxic emissions from photocopiers, computer equipment and carpets shown to cause headaches, fatigue and nausea.

Demita helps people work and feel better.

“Projecting individuality is important in business. We create environments that do it in the most natural possible way.”

Exteriors: Planting and Landscaping

For the great outdoors.

Walkways, terraces, patios and frontages: they're your rooms outside. Demita's landscaping and planting skills let you define, furnish and enjoy them.

Enjoy vibrant hanging baskets and troughs, awash with fragrance and colour. Realise a new space in the sky with a spectacular rooftop garden. Relax in a beautifully landscaped courtyard, complete with water features and ornamentation.

You'll find us naturally enthusiastic, yet reassuringly sensitive. Co-ordinating themes is a speciality. From classical to contemporary, floral to foliage planting, you can trust us to work with you to precisely meet your brief.

Whatever we agree, your project is planned meticulously. Your daily business matters, so we minimise disruption.

Inside or out, large scale or small, put professional plant displays to work for you.

To be inspired, talk to Demita.
